

5th Grade Opinion Prompt

I think some parents should restrict the number of hours of TV time it just depends on the kid, like if the kid is obsessed with the TV to the point until their failing in class sometime should be restricted. But if the kid is doing good in school, and doing what at their told to do they shouldn't have time restricted.

Although, they do need to go outside and do something or spend time with their family or friends. But TV can be educational but parents should approve of what their kid is watching. Parents just need to make sure that their child is not spending half of their lives watching TV, so sometimes just go out and have some fun together !

Organization/Purpose – 3-

- Opinion is clear but with general reasons stated
- Weak beginning/adequate ending (I think...)
- Progression of ideas is inconsistent sometimes unclear (from go outside and do something with their family and friends to TV can be educational)

Evidence/Elaboration – 2

- Limited development of reasons and evidence using facts and details
- Some vocabulary is ineffective for audience and purpose (something, doing good, sometime)
- Style is evident (just depends on the kid, obsessed with TV, half their lives watching TV)

Conventions – 1

- Sentence fragments and run-ons
- Punctuation errors – overuse of commas
